

Credit Name: CSE 2140 2nd Language Programming

Assignment Name: Math tutor mastery

How has your program changed from planning to coding to now? Please explain?

I've considered the division by zero, what's impossible if the numbers will be generated from 1 to 10

```
// Handle division by zero
if (operator.equals("/") && num2 == 0) {
    num2 = random.nextInt(9) + 1; // Ensures num2 is not zero
}
```
