Credit Name: CSE 2140 2nd Language Programming

Assignment Name: GuessingGame mastery

How has your program changed from planning to coding to now? Please explain?

I tried the println to display the numbers:

```
System.out.println("Computer's number: ", SecretNum);
System.out.println("Player's number: ", UserNum);
```

So i changed it to:

```
System.out.printf("Computer's number: %d\n", secretNum);
System.out.printf("Player's number: %d\n", userNum);
```
